

# A resilient supply chain starts with Multi-Tier Mapping

Know exactly which suppliers, sites, and parts are at risk

Map your entire supply chain, down to the site, product, and part level. You'll gain unmatched sub-tier visibility and - when disruption strikes - the ability to act quickly.

By mapping your suppliers, and their suppliers – down to the nth-tier – you can:

Visualize your entire supply chain

Make informed decisions within minutes

Keep a pulse on all the potential vulnerabilities

Reduce supplier allocations, shortages, and expedites

Spot sub-tier failure points down to the site and part level

Achieve an annual ROI of \$5-10 million

## Resilinc offers unmatched mapping visibility:

10+ years of mapping data

95% of the global supply chain mapped, down multiple tiers

80K suppliers mapped

350K+ sites monitored

3M+ part level

375K+ sub-tier suppliers

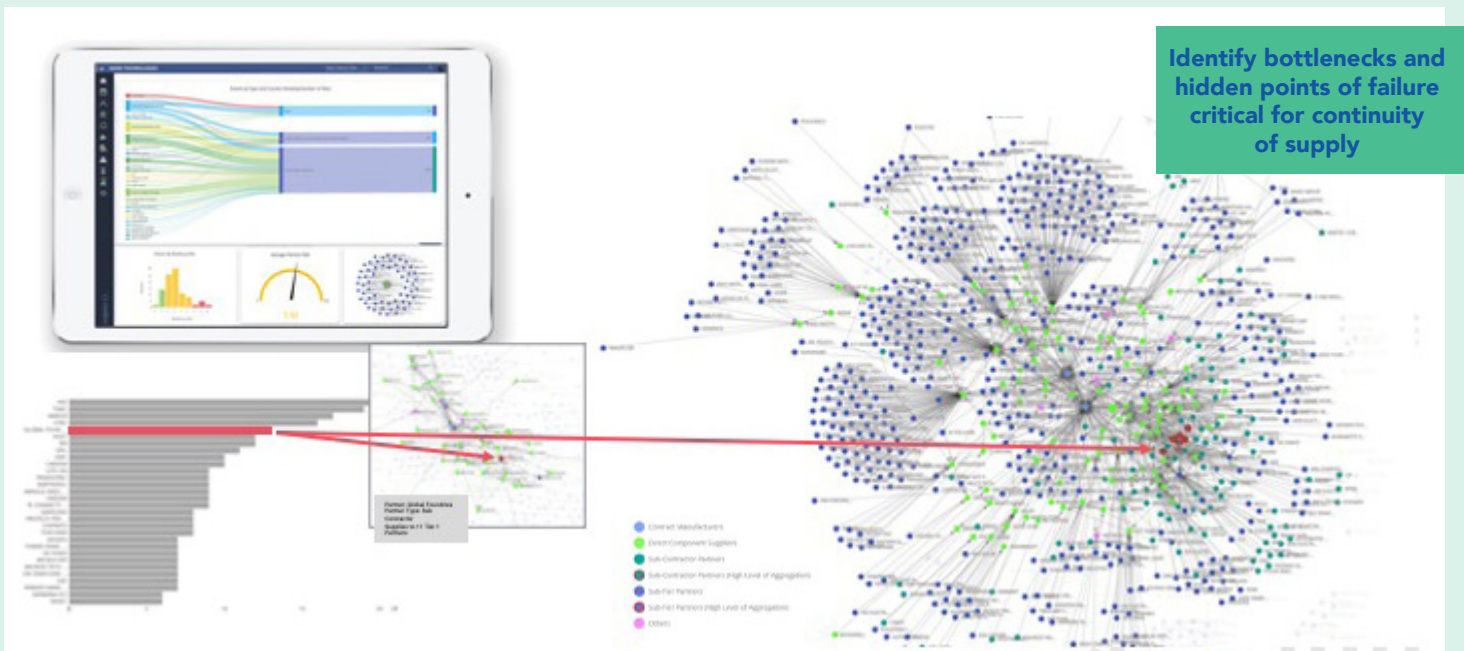

We avoided four week lines down due to a sub-tier supplier being in a flood evacuation zone. We called our Tier-1 supplier and diverted a key shipment before the Tier-1 supplier even knew.

-Global Sourcing & Procurement executive

## Multi-Tier Mapping: Powerful network visualizations to spot sub-tier failure points
